

Interceptor

```

public class SessionInterceptor extends HandlerInterceptorAdapter {
    @Override
    public boolean preHandle(HttpServletRequest request, HttpServletResponse response, Object handler) throws
    ServletException {
        HttpSession session = request.getSession();
        String id = (String) session.getAttribute("loginID");
        System.out.println("인터셉터 로그인여부:" + id);
        if (id == null){
            try {
                response.sendRedirect(request.getContextPath() + "/login.go");
            } catch (IOException e) {
                e.printStackTrace();
            }
            return false;
        }
        return true;
    }
}
  
```

```

<interceptors>
  <interceptor>
    <mapping path="/*.do" />
    <beans:bean class="com.acorn.interceptor.SessionInterceptor" />
  </interceptor>
</interceptors>
  
```
